

1     ABSTRACT OF THE DISCLOSURE

          A timing controller for a liquid-crystal  
display panel includes a data enable signal detection  
circuit which detects a data enable signal applied to  
5     the timing controller, and a timing generating circuit  
which controls a display timing of image data to be  
displayed on the liquid-crystal display panel on the  
basis of the data enable signal detected by the data  
enable signal detection circuit.
